

**This Insurance Plan Includes:  
Repair or Replacement of the  
following parts:**

- Thermostat - T87
- Oil Burner Motor
- Ignition Transformer
- Steam Glass Gauge & Washers
- Nozzle and Strainer
- Fuel Pump Strainer
- Ignition Electrode Set
- Beckett End Cone
- Fuel Pump
- Ignition Wire Set
- Circulator Coupling
- Fan & Limit Control
- Air Filters (1" fiber glass only)
- Pressure Trol
- Aquastat
- 6006, R8182, L8124
- Oil Burner Fan
- Blower Motor (heating season only)  
(up to 1/2 HP)
- Blower Belt
- Belt Drive
- Circulator Motor (1 motor per year)  
B & G 100 or Taco only
- Nozzle Line
- Electric Switch
- Circulator Relay
- Oil Burner Coupling
- Fuel Oil Filter Complete
- Fuel Oil Filter Cartridge
- Cad-Cell Relay
- Stack Relay
- And Labor To Install These Parts
- Annual Boiler or Furnace Cleaning
- Cleaning and Adjusting the Oil Burner
- Internal Vacuum Cleaning as Necessary

**Optional**

- |   |                             |
|---|-----------------------------|
| A. Oil Burner and Controls of<br>(not including water tank)<br>Oil Fired Water Heater   | <b>\$79.95</b><br>Plus Tax  |
| B. Oil Storage Tank Protection<br>(inside tank only)  | <b>\$34.98</b>              |
| Protection includes only oil tank   |                             |
| *Cost of piping, venting & labor for removal & replacement<br>excluded, as is cost of oil and cleanup of leak   |                             |

Clean coils if required and also check freon<br>levels. Includes up to 3 lbs. R22 freon. | <b>\$149.95</b><br>Plus Tax |

**TERMS & CONDITIONS**

- This insurance plan is designed to assure you of economical and carefree heating. This plan is available to Eastern Fuel Corporation oil customers whose primary residence purchases its total fuel requirements from Eastern Fuel and use an annual minimum of 600 gallons or more on **automatic delivery only**.
- If customer's credit becomes impaired during the life of the Burner Service Agreement, the Service will be discontinued until credit terms have been reinstated. **This Plan is void if not paid in full within 30 days of issuance of policy.**
- All heating equipment is subject to our inspection and approval for acceptance of any Service Plan, and coverage is limited to single family residential heating systems only.
- Service contract commences on date of issue for term of one year. This policy is automatically renewed unless cancelled by either party. No refund will be given if policy cancelled by homeowner after effective date.
- This plan may be transferred to new owner in event of sale of premises, providing fuel purchases are continued with Eastern Fuel Corp.
- Charges for work performed by persons or companies other than those authorized by Eastern Fuel are not reimbursable under this plan.

**ALL PLUMBING WORK EXCLUDED**

Just as there are specified parts which we will repair or replace at no cost to you, there are parts for which we must charge. The following is a partial listing:

- |                             |                        |
|-----------------------------|------------------------|
| Boiler                      | Power vent             |
| Heat exchangers             | Water heaters          |
| Domestic hot water tanks    | Tankless coil          |
| Circulator bearing assembly | Radiators              |
| Flow valves                 | Mixing valves          |
| Pressure reducing valves    | Automatic water feeder |
| Combustion chambers         | Duct work              |
| Blower parts                | Flue pipe              |
| Draft Regulator             | Humidifier Parts       |
| Oil & heat piping           | Electrical wiring      |
| Programed Thermostat        | Thermostat wiring      |
| Low water cutoffs           | Zone Systems           |

Parts listed as obsolete and non-obtainable will be updated with modern controls and will be chargeable to the customer on parts and labor basis at prevailing rates.

Oil smells, minor oil leaks, vibrations, noises, minor water leaks, chimney smoke, slight delays, thermostats not accurate or any other minor complaint will not be regarded as an emergency under this contract and arrangements will have to be made during normal business hours Monday through Friday.

- Protection Plan policy provides for the repair or replacement of any or all parts listed in this folder. No other labor cost or parts of the furnace, boiler or heating system are covered, such as the servicing and replacement of any device that water passes through such as piping, radiation, valves, domestic hot water hook-ups, etc.
- Emergency calls resulting from burner failure caused by flood, fire, lightning, power failure, blown fuses, main switch off, flooded heating system, no oil in tank (except when customer is on our Automatic Delivery basis), no water in the boiler, or other conditions beyond our control, will be charged at our prevailing service rates.
- When parts are not available, due to obsolescence, or when a burner has become unworthy and is considered to be a hazard, a discount of one hundred (\$100.00) dollars will be allowed toward the replacement of a new oil burner.

### What to do if your furnace won't start ...

#### 1. Check your thermostat

Set the thermostat 5 degrees above the room temperature. If it is a clock thermostat, make sure the time is correct (AM or PM).

#### 2. Check electric switches

Make certain that the stair switch is in the ON position and also check switches next to furnace or boiler.

#### 3. Check reset button

Press the red reset button on a gray box. Location of the gray box could be in the flue pipe, on the burner or in front of boiler.

Caution, press this button once only! If the burner still does not start, press a red button located on the burner motor.

#### 4. Examine Fuses or Breakers

Make sure the fuse is not loose or burned. Switch breaker off and then on again.

#### 5. Is boiler water level O.K.? (steam only)

Make sure water level is half way up gauge glass. If the level is low, open the water feed valve until correct level is restored . Then close valve tightly.

#### 6. Check your oil tank

Be sure there is oil in the tank and oil line valve is open.

7. After checking 1 thru 6 and still have a problem, call service dept. at 203-248-2111.
